

### CARPIGIANI SOFT SERVE & SHAKE CONSULTING

**CARPIGIANI SOFT SERVE & SHAKE CONSULTING** consultants can help you transform your idea into a successful business!

# High production capacity

Produce Soft Serve Gelato, Ice Cream, Sorbets and Frozen Yogurt. Thanks to the independent cylinders, it is possible to simultaneously create frozen desserts of different consistencies.

### Creamy Soft Serve Gelato

Thanks to the H-O-T system and to the type of feed (gravity or pump) it is possible to set the desired consistency for creamy ice creams, from a delicate Vanilla to a robust chocolate.

### **Soft Serve Sorbets**

Choose the desired consistency of the Soft Serve Sorbets, thanks to the H-O-T system and to the type of feed system used (gravity or pump).

### **Frozen Yogurt**

Choose the desired consistency of the Frozen Yogurt, to produce a classic frozen yogurt or a unique soft serve gelato yogurt. Thanks to the H-O-T system and to the type of feed system used (gravity or pump).

### **Custom shape Gelato**

### PERFORMANCE AND QUALITY

#### Choice of **DOOR**

### Twin Twist door (also available in Star version)

On the Twin Twist door, lowering the left and right levers dispense single flavors, the central lever dispenses a mix of the two.

**Two Independent Doors (also available in Star version).** Independently functioning doors allow the user to simultaneously run different programs on each side. For example, a user can run a pasteurization cycle, while the other side is in production mode, or even to run a cleaning cycle on one side while remaining in production on the other side.

**Monoportion kit** Kit of nozzles designed for filling cups, containers, jars, trays, or for producing mono portions.

**Nozzles.** Customize the Soft Serve by choosing new and unique nozzles that fit your style.

### PERFORMANCE AND QUALITY

#### Choice of MIX FEEDING SYSTEM

#### **Pump - Version P**

Ideal for creating dry and compact Soft Serve. Pressurized steel pump with advanced thermoplastic polymer gears. Thanks to the holes in the pump regulator, it is possible to obtain 40-80% overrun. It is possible to adjust the overrun even when the tank is full!

#### **Gravity - Version G**

Ideal for a dry and compact Soft Serve with up to 40% overrun. The different diameters of the feeding tube holes naturally dose the mixture with air. It is possible to adjust the overrun even when the tank is full, using the overrun adjuster, thanks to the feeding tube holes, which are above and below the mix.

#### 3.8 L Direct expansion cylinder

Optimized refrigeration process. Faster freezing times & more energy savings. Pre-loading operation is simple and safe, thanks to the new position of the feed hole.

### > PERFORMANCE AND QUALITY

### Hard-O-Tronic®

The electronic control system that allows you to change the consistency of the Soft Serve in a simple and fast way.

### Independent refrigeration system and user interface

Each side runs independently and user can even use just one side if needed.

### BEATER

**Detachable high efficiency beater made from POM thermoplastic.** Creates a soft & creamy soft serve gelato.

### CONVENIENCE

## New solutions for maximum **convenience during use**

#### **Tank Agitator**

Prevents product stratification during storage and improves heat exchange during pasteurization.

Scan the **QR Code** on the front of the machine to access the most up to date equipment information: Instruction Manual, Carpi Care kit & Carpi Clean kit.

### **Self Closing**

User-friendly Self Closing levers automatically close to stop the flow of product, eliminating any waste. Automatic self closing levers are easy to assemble & disassemble. Ideal for rotating staffs.

Adjustable dispensing speed Adjustable delivery flow to meet all volume and speed needs.

### SAVINGS

### High-performance electric motors and condensers

Independent pump transmission (P version). Extends the life of the pump and gears. Ensures flexibility with high performance.

Water-cooled machine. The refrigeration system is cooled thanks to the inlet and outlet water circuit accessible at the rear of the machine. Air cooled machine. Thanks to the rear chimney, it is possible to optimize the installation space and to place the machines side by side.

Choice of **COOLING** 

More operational safety and more control during production

**Ergonomic design.** Reduced risk of injury, with corners even rounder where the operator works.

#### Black-out and water outage

After a power or water failure, if the temperature-time parameters guarantee that the mixture has not undergone any alteration, the machine resumes the program in progress. Otherwise, if the machine is self-pasteurizing, a pasteurization cycle is automatically started, warning the operator with a message on the display. In the case of the non self-pasteurizing version, the machine requires washing.

### **Button lock**

For added security, the display buttons can be locked to prevent accidental errors.

JEOREMA

#### Teorema

Guarantees facilitated assistance by providing on-line monitoring and diagnosis on a tablet, phone or PC wherever you are.

### > HYGIENE

### Easy cleaning, guaranteed hygiene

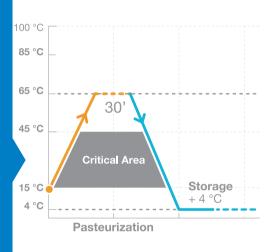

#### Multifunctional Cleaning Button

Possibility to activate or deactivate the pump and the beater individually or together according to cleaning needs. One of the functions is hot cleaning. By simultaneously activating the beater and the heating of the cylinder surface, the production grease residues are quickly dissolved.

**Standard**. With the automatic **self-pasteuriza-tion** system you can choose when to wash the machine up to a maximum interval of 42 days. As a further guarantee of hygienic safety, if the operator does not perform the complete cleaning at the end of the set days, the machine goes into automatic block.

#### Carpi Care kit

Custom kits, designed to always keep your machine hygienically perfect.

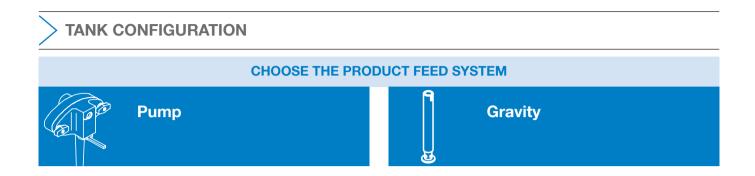

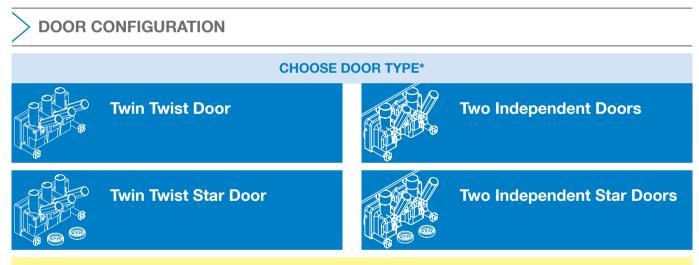

**Scheduled start.** Set the production, pasteurization, and storage programs to automatically run at a convenient time for you, such as overnight, to be fully operational the next day. **Rubber tank lid.** The lid can be partially opened to fill tank without completely removing lid.

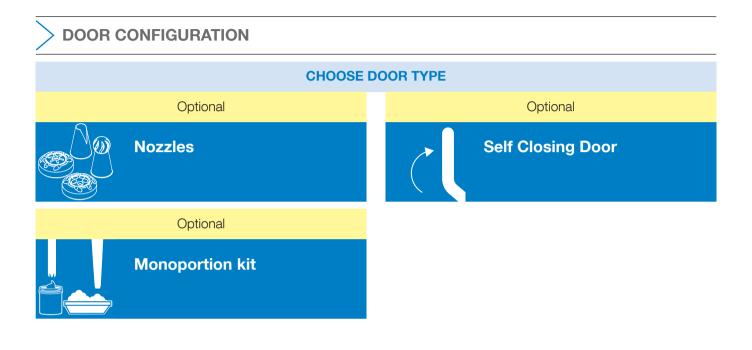

### MACHINE CONFIGURITATION

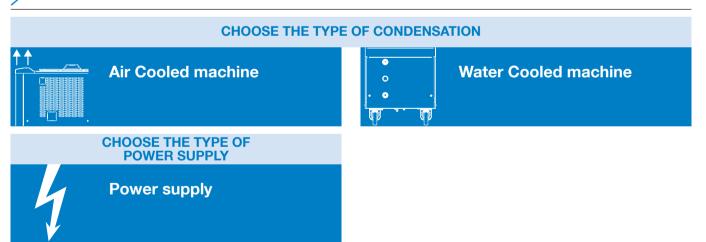

\*Each type of door can be purchased as an optional

### MACHINE CONFIGURITATION

### > TECHNICAL CONFIGURATION

### CARPIGIANI SERVICE CARPIGIANI services

#### **WHO WE ARE**

Carpigiani Services. Always by your side! The extensive Carpigiani service network is at your disposal with a widespread assistance network that guarantees a wide coverage of the territory with over 480 authorized service centers and 1500 specialized technicians around the world, for over 70 years guaranteeing a widespread, global presence. Carpigiani Services ensures rapid and professional assistance.

#### WHAT WE OFFER

Original spare parts. Carpigiani original spare parts, manufactured in compliance with national and international food safety regulations, ensure the durability of the components and extend the life of the machine. They are the only ones able to guarantee efficiency and safety. Carpigiani original spare parts are guaranteed for 1 year.

### Carpi Care kit

kit. Dedicated kit of gaskets and brushes to keep each machine

MONTHS

Carpi Clean kit

### CARPIGIANI SERVICE

#### **WHAT WE OFFER**

**Specialized technicians.** Carpigiani technicians are professionals who are always up-to-date thanks to solid and constant training courses that guarantee high levels of competence for any inspection, maintenance, cleaning and repair intervention.

Preventive maintenance.

Thanks to periodic checks, entrusted to certified technicians, the machine can always work in optimal conditions, preventing any downtime.

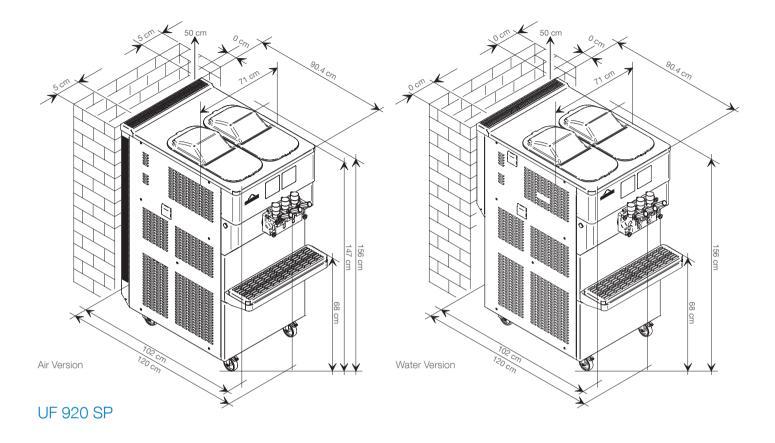

**Extended Warranty.** Operate machine in complete tranquility, thanks to the Carpigiani extended warranty. In case of needs, in fact, Carpigiani technicians are able to restore machine operation with original spare parts.

**Scheduled Cleaning.** Possibility of entrusting the periodic cleaning of the machine to expert technicians.

**Teorema.** Teorema Remote Control and diagnosis system for remote monitoring of machine operation. The customer can access the machine via computer, tablet or mobile device to remotely monitor operations. Teorema also facilitates the assistance service: Carpigiani technicians are alerted on the configuration parameters as if they were operating directly on the machine. technical data - dimensions
